Warranty (non-commercial use)	2 years
Certified quality	BPA-free*, 

- Appliance with 100 % stainless steel housing
- Six stainless steel food dehydration racks
- Stainless steel crumb tray
- IEC power cord
- User manual

Available accessories:

- PTFE dehydration sheets, item no.: 56332
- Silicone dehydration sheets, item no.: 56333
- Pro slicer made of stainless steel or with stainless steel elements, item no.: 68204/68208 (for quick fruit and vegetable preparation)

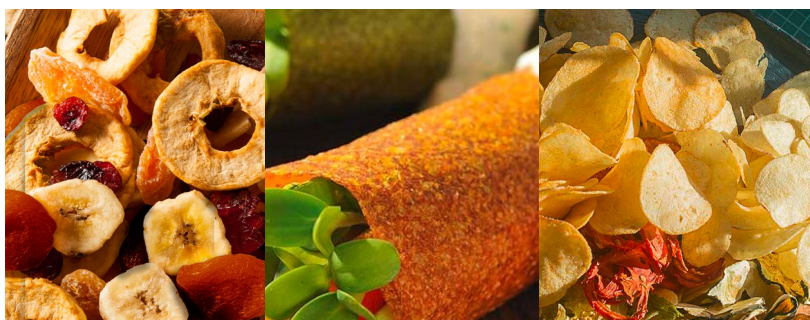

Available colours: Stainless steel

The Wartmann six-rack WM-2206 DH food dehydrator is a premium appliance made almost entirely of stainless steel (excepting the electronics and power cable). This quiet-running machine delivers optimal dehydration results, offering best value for the money.

The six-rack Wartmann™ stainless steel food dehydrator is extraordinarily compact, making it ideal for making small batches and kitchens with limited space. The real glass pane in the door affords a clear view of the inside, with switchable interior LED light, so you can monitor how your dehydrating foods are doing at all times.

The WH 2206 is the quietest of Wartmann's three food dehydrator models. A low-noise fan moves warm air horizontally across the 0.59 sqm of dehydration area, ensuring reliably even dehydration on all six stainless steel racks.

The desired temperature and dehydration time are easy to set via touch control panel on the front of the appliance. Having the panel on the front rather than on top means you can place the machine around head height and still work the controls. The front-facing dehydration temperature and time settings (25 - 90 °C; 30 min. - 72 hours) are thus always in view.

Dried fruit

Fruit leather

Veggie chips

*All food-contacting parts BPA-free.
